GENERAL MANAGER				DATE	
SVRA CHAIRPERSON				DATE	

A residential structure may have an attached or detached dog run located at the back or side of the house. A dog run at the side of a house will be approved only when location at the rear is impractical. A dog run cannot exceed 128 square feet, with a maximum height of 6 feet. Dog runs may be constructed of chain link, or acceptable fencing materials outlined in the RESIDENTIAL FENCE POLICY. Plans for a dog run must be submitted to and approved by the Architecture Control Committee prior to construction.
